Voos atrasados em 2015 Documentação Camada Silver

Modelo Entidade-Relacionamento (ME-R)

Entidades:

FLIGHT

Atributos:

FLIGHT (<u>id_flight</u>, month, day, day_of_week, airline_iata_code, airline_name, tail_number, origin_airport_iata_code, origin_airport_name, origin_airport_city, origin_airport_state, origin_airport_latitude, origin_airport_longitude, destination_airport_iata_code, destination_airport_name, destination_airport_city, destination_airport_state, destination_airport_latitude, destination_airport_longitude, scheduled_departure, departure_time, departure_delay, scheduled_time, elapsed_time, air_time, schedule_arrival, arrival_time, arrival_delay, air_system_delay, security_delay, airline_delay, late_aircraft_delay, weather_delay);

Observações:

- Da camada Bronze para a camada Silver, juntamos as entidades em uma única. Para isso, retiramos os seguintes atributos de FLIGHT:
 - o diverted:
 - cancelled;
 - o cancelation reason;
 - distance;
 - taxi_out;
 - wheels off;
 - taxi in;
 - wheels on;
 - o flight number;
 - year;
- Da entidade AIRPORT retiramos:
 - o country;
- Depois criamos um novo atributo de chave primária 'id_flight' e transportamos os atributos restantes das entidades AIRPORT e AIRLINE para a entidade FLIGHT.
